I have been for some time now struggling with self-confidence, and I also have been very critical to others. Analyzing people is very important especially in the business world. If you're in the marketing department or if you're presenting a project proposal, it is very important that you get to analyze the reactions of the people in front of you. I'm in the business world (small but still business world) and I try my best to analyze people but I fail horribly so I thought I'd get some help and read a book about it.I'm pleased to have grabbed this particular book. The tips and pieces of advice seem legit and given my experiences when it comes to dealing with people, I had to agree with most, if not all, that

was written in this book. While reading, I was able to figure out what I was doing wrong. My decoding was wrong so I have to correct it. This book has been really helpful and I have Kellie to thank for sharing the tricks.

The basic purpose I can see behind the contents of this book is to incorporate some knowledge and some proven facts in this process that can help us make this initial judgment and sizing up as solid as possible. The natural process is based solely on instinct and experience. If a few rules can be added to broaden the spectrum of the initial analysis then in most likelihood we will be able to analyze a person right from the start and mostly be correct about it.

I enjoyed this book. I like thoughts that tackle a standout amongst the most vital things in life, out how to manage others. The book permits you to comprehend yourself, your inclination, as a social individual, and your surroundings. The writer of the book separated individuals into specific classes in view of their physical appearance and associated it to propensities and practices. what the creator composed is genuine and it exists.

Controlling & Manipulating people's minds by Reading Faces. In this book you will learn how to knowing people's personality from their face. The way you talk, your body language, your facial features and Everything else that is related to you reflects hidden parts of your personality. By learning from this book how to look for those clues and how to interpret them you will get this superior self understanding of others and of yourself. After reading this book you can realized which people's emotion are real and which are fake ,Author nicely narrated.
