First off, thank you so much Janie for sharing this info. I am guilty eating raisins and will stop immediately. It's goes straight to the point telling me the foods I should and shouldn't eat and the last chapter is the best part as it has numerous meal suggestions. But for the first two chapters that talk about the 20 foods to avoid and 20 foods to eat, I can't help but think that the list would look so much cooler as an infographic. Something I can print and hang up on my kitchen wall so I am always reminded.

This book mainly discusses on how to prevent diabetes, what to do if you have them, what are the food to avoid and how your lifestyle should be if you are a diabetic. I think this is a common disorder especially for people who likes sweets or maybe fat. I think this guide helps raise awareness. The book provides a list of food which is good for you and your health if you are diabetic a good example would be apples, avocado and fish etc. Bad foods would be potatoes, whole milk, pretzels, fruit juice, sausage etc. The guide also included some recipes you can do at home which are good for diabetic people and healthy for you like the Chicken Tortilla Soup which was recommended in this guide.

It's obvious that almost all the food and drinks we take have sugar in it for the number of people with diabetes. This is a great way to help people be aware of the food they take. I can say that the author is very clever! Besides from showing the worst foods for diabetes, she also listed the food list, meals and menus to lower your blood sugar. She knows it's really hard to adjust with the lifestyle that is why she made this book to educate people. Nice job!

The perfect comparative material that is of great help for those who want to know the do's and don'ts in preparing diabetic meals. It is never easy being a diabetic. One wrong food ingredient and it would endanger your sugar levels. It is so nice of the author to include diet plans and recipes that safe and beneficial for diabetics and most importantly your appetite would not be compromised.

Diabetes and High Cholesterol runs in the family. We have been haunted by it for most of our life and have always been cautious about our diet. This book definitely fit our family. The book was informative and educational. It helped us determine what are the different types of food we should avoid and what we should include more in our diet. It is definitely a great book to have for those who suffer from diabetes or do not want to have diabetes.

Such a very helpful book! This should be a useful read for those suffering from diabetes. As someone who has suffered from diabetes for years, I was pleasantly surprised at how effective some of the remedies shared in the book are. The author shares a lot of diets which should go a long way in helping you drop your blood pressure and alleviate diabetes. So much worth recommending to others!

My step Dad have a diabetes though it's still not chronic in his case I can see how disciplined He is to just maintain his sugar level. I can see how hard it is to have a diabetes, many foods to avoid so you can live longer. You have to be disciplined and cautious about your health all the time. My step dad doesn't drink any medicine from the doctor, he drinks herbal medicine though. Glad i found this book that will surely help him, all the things needed to cure or control diabetes are listed here. The foods that are perfect for diabetic can be found in this book. A very helpful book for everyone.

My mom is a diabetic and I after reading this book I knew right away that this is a perfect fit for her. The book contains knowledgeable information about which food is good and which are bad for her.

The recipes are extremely delicious. This is really a great book for those people who suffer from this kind of illness and I'm pretty sure that my mom will really love reading it.
