Customer Reviews

I purchased this book from the author at a teacher's conference; this review is my honest opinion. The first time I heard dynamic Lisa Murphy (The Oogey Gooley Lady) give a presentation I knew I had been blessed with learning from an expert. She presented some of the activities in this and her other books and made science fun for the teacher. She showed how to make it fun for the preschoolers and 'trick' them into learning about science through play. Even More is packed full of useful helpful, and creative learning activities to increase the class scientific knowledge and give you lots of new ideas for lesson plans. She includes all the scientific explanations to make it super easy to use.

I love that this book has a supply list in it. The experiments are hands on and easy to do with young children.

Great resource!
