Invisible Rainbow: A Physicist's Introduction To The Science Behind Classical Chinese Medicine

Synopsis

Changlin Zhang provides a scientific basis for the success behind alternative therapies such as acupuncture, qigong, Ayurveda, and other traditional therapies in an illuminating discussion that explains the efficacy of these approaches in treating a number of chronic conditions. Underlining how public perception of acupuncture has shifted over the last few decades from one of skepticism to one of acceptance, he explores the progression of acupuncture research from its unsuccessful beginnings to the ultimate discovery of a scientific basis for therapies centered on the subtle coherence patterns of interacting electromagnetic waves and fields. He explains the dissipative structure of electromagnetic waves that constitutes our electromagnetic body and describes how changes in our mood, lifestyle, and environment affect it. Invisible Rainbow explains these developments within the context of science's parallel development from its nineteenth-century focus on materialism, reductionism, and closed systems to its realization of the mass-energy equivalence, electromagnetic field, and its study of open complex systems. Discussing differences in Eastern and Western thought traditions and how they influence their respective medical systems, it also elucidates acupuncture's meridian system and Ayurveda's chakras and auras.

Book Information

Paperback: 248 pages

Publisher: North Atlantic Books; 1 edition (July 12, 2016)

Language: English

ISBN-10: 1623170109

ISBN-13: 978-1623170103

Customer Reviews

It is the honor to write a first review for this kind of great book. I read it only half of the book but I had to write it. The book represents a new and great scientific and also philosophic point of views of Dr. Zhang. I recommend anyone who is interested in Acupuncture and science in a holistic point of view.
