Good information, but the title confused me. I read it as Don't waste your time (by) homeschooling. It became apparent that you meant (while) homeschooling.

As a public school employee, and mom of public school students, I was curious...will this apply to me? I was pleasantly surprised to see that, really, this has so much to do with intentional parenting.

Absolutely this applies to public school parents as well. Our lack of involvement and input with what is taught to our children makes it even more critical to be invested and create these learning moments that are offered in this book. It also confirmed the work that our homeschooled kids in our surrounding neighborhoods are doing. What a great perspective for those of us who are not experiencing this with our own children. Nicely done. I will absolutely recommend this to others who are considering homeschooling or to just those who are invested in their children's education.

I really enjoyed Traci's 72 pieces of wisdom, gained from her 20 years of home schooling experience. This book is worth reading, and rereading, to keep your priorities straight and your sanity intact.

I thoroughly enjoyed this book. As a homeschool mom, I can appreciate many of the things that Traci points out in her homeschooling journey. I would recommend this book veterans and for those that are considering homeschooling their children. There are many of the 72 things that she lists that I wish I had done homeschooling my kids! It's terrific!

After seven years of homeschooling, I have been a little burned out this year; but I found quite a bit of encouragement in this ebook. Many of the thoughts expressed are things I had discovered along the way. However, it's always nice to be reaffirmed regarding this mission. This ebook is particularly great for new home educators and those considering the journey.

As a homeschooling mom she hits on all the major issues! Reaffirming to have support from someone with much more experience-

It's hard for a "normal" mom to homeschool. It's super hard for a "normal mom" with low income, no car, no fancy trips, and Def. no dance classes or swimming classes. I don't know how many low income homeschooling mom's exist, but I wish they would share their wisdom. This is still a great read, but I'm not the targeted audience.

This wasn't a book it was an essay \$3 feelings little ripped off. It gave good advice but it was not long enough.
