## Synopsis

Text only. This product does NOT include a Resource Central Access Code Card. To purchase the text with a Resource Central Access Code Card, please use ISBN: 0-13-283007-8

**Building Construction: Methods and Materials for the Fire Service, Second Edition**, emphasizes the impact that an understanding of the principles of building construction has on firefighting strategy. Written by an author with extensive knowledge and experience in both the fire service and construction industries, it explains building materials and processes that are involved in the construction of structures and provides students with the knowledge required to operate safely and effectively within residential or commercial buildings. Discussions of actual incidents experienced by the author and case studies containing critical thinking questions give students a better understanding of what to expect in the field.

## Customer Reviews

I needed this book for my fire technology class on building construction. The book is not very long which is nice because you are not bombarded with a large amount of extra frivolous facts and information in the chapters like other textbooks. The price and delivery were good so it made it better than buying from the college bookstore on campus which wanted almost double for what I paid here.

very informative book

good book
