Read on your PC, Mac, smart phone, tablet or Kindle device. In the last few decades, people all across the planet have come to a realization “ many of the products that we use everyday are made from harmful man-made chemicals. This extends to the repellents that we use for insects and other pests. While effective at thwarting off nature’s critters, the long term effects of some early man-made pesticides and herbicides are just coming into the light. We have seen the harmful effects from years of these dangerous man-made chemicals. From an increase in cancer rates to a shocking rise in the number of reported cases of autism, our modern world has provided great wonders that all too frequently are harmful for our body. The insect and bug repellents that are being sold today are wholly unnecessary. There long existed proven methods to repelling pests that do not rely on harmful chemicals. Using common ingredients from nature and around your home, this book serves as a guide for creating sprays and ointments that will keep bugs away from you and your home, without you having to worry about the after effects. The methods to repel insects in this book absolutely work. I have tested them myself and refined their formulas many times over the last five years. I come to you now with an answer, one that will solve repelling outdoor pests while still being an entirely natural solution. Start reading today and protect yourself from both harmful man-made chemicals and nature’s pests. In This Book You Will Find: A brief overview of the benefits of natural bug and insect repellents Natural and proven methods of repelling bugs, insects, arachnids, and other critters. Formulas that have been used personally, by me, and been tweaked for years to produce the best possible results. 31 proven methods for repelling just about every type of bug or insect. Tips for how to secure your home from nature’s infestations. BONUS - 2 FREE BOOKS on home remedies and natural remedies Much, much more! Download your copy today! Customer Reviews

With different viruses which are spreading nowadays because of mosquitoes, bees and other insects, I became very interested about repellents. However, these repellents that are available commercially have very dangerous chemicals. And after reading this book, I got basic ideas on how to make homemade repellents. I can see that the ingredients that were used are organic and are safe. I enjoyed reading the book.

The most common problem that how to get escape from insects that can cause of diseases. I and my family had suffered a lot from this problem that different types of insects invading into my house and I was just sick of all that but pleasure to have a good friend she suggested me this book that after reading this book i can easily make homemade natural repellent to secure from dangerous insect. I have applied these natural repellents and feeling secured from ants mosquitoes and other bugs.

â Buying repellents in stores can cause you much just to avoid bugs in your home. It also causes

danger to your health especially to your children because of the chemicals it contains. Do you know that you can make effective repellents by using organic and natural ingredients that cannot affect your health and your kids? Well, in this book you will find tips on how to make organic but yet much effective repellent than the ones you see in stores.

I live in a basement and it seems to be infested with all types of bugs, spiders, wood bugs, moths, ants, flies you name it. Ive been trying to let them be because I prefer not to use man made chemicals. This book has given me natural solutions to all of my bug problems. All of the repellent recipes are simple 2-4 ingredient which is a bonus because I don't want to spend a bunch of money, some of the ingredients most people have in their pantry already. For example the fly recipe is only lavender oil, citronella oil, mineral water and a spray bottle, so easy! I find this book to be very helpful, it even gives you ways to bug proof your entire outside to catch the critters before they enter. This can be done with regular table salt but be cautious if you have deer in your neighbourhood because "deer will be attracted to the salt and they will seek the surfaces where it is located" This book was a great purchase!

Homemade repellents are better than those whom we can buy at any convenience store. For we know the contents we made or how we do it we regards to our likes and dislikes. In this book I learn some strategies on how to avoid using dangerous man made chemical repellents and to switch over to more effective and healthier natural repellents.
