Manifest Destiny: Lincoln Sneezed

Synopsis

Manifest Destiny is an alternative history series based on the presumption that Abraham Lincoln survived the assassination attempt by John Wilkes Booth. From the moment he survived, the time-line of United States history dramatically changed. The harsh reconstruction of the former Confederate states by Radical Republicans was altered. A newly reunited, and highly militarized country stepped aggressively onto the world stage. Significant obstacles remained. Among them was what to do with the former slaves, the failure by Great Britain to address the Alabama Claims, and an energetic push west.

Interesting take on post-Civil War alternate path. However it suffered from poor editing. There were many misspellings, and wrong words used; the latter were most perplexing as the correct words would be used in the same context. Two blatant examples were when the terms "courier" and "martial law" were called for, but "currier" was used instead many times for the former while "marshall law" was used for the latter (and even then double L spelling of the name rather than the

single L of the office).However, regardless of the above, I'd like to see the second book in the series.

Had Lincoln sneezed as Booth fired, Lincoln would have survived as Booth's gun was a single shot. From there, Lincoln would chart a new course in American history, dominating world events, to achieve Manifest Destiny. He weaves lots of Revere (formerly North Chelsea) stuff into it. Brian shows he has a lot of knowledge of the Civil War, it's ships, it's guns, 19th c. Naval strategy, etc.

Decent and well thought however the lack of an editor prevents me from giving more than 4 stars. I do however look forward to a sequel.
