How to End an Unhappy Marriage.. As sad as it may sound, this book has discussed things that are also relevant. In the present society that we have now, it seems that marriages are ended just like that. But when do we know that it is really time to throw in the towel? This book has given all there is to know on how one can end an unhappy marriage; like how to determine if it is really over, deciding to end it all up, tips on how to prepare oneself for the big day, and so much more. But what must be read and comprehended well is how to move on. I think this is such a great book to read.

One of the most to-the-point books on the subject I've ever read. Deciding whether or not to end your marriage requires lots of contemplative thought and considerations of all the details, options, and consequences. Then, once you have made the decision, youâ™ll need colossal strength to endure the difficult period that will follow. This book offers some steps for ending your marriage, freeing yourself emotionally and physically, and moving on with your life. I've found this book to be practical, logical and easy to grasp. This book is the best read for everyone who is going through rough ride on their married life.

Great book! Although I am still not married, much less having to deal with an unhappy marriage, but I am very happy of what I am able to learn from the book. I hope I never have to deal with unhappy marriage, but the chance of that happening is not that high. I am glad to say what I learned in this book will provide me the solution to do what I need to do when I have to deal with an unhappy marriage. Highly recommended!

Well, this book had opened my mind in whatever possibilities when ending a marriage. When two people agree to become through marriage they both knew itâ™s a lifetime commitment but some end up getting divorce. We canâ™t force someone to continue a relationship that only one fights for it because itâ™s a 2 way relationships or communications. This book is great!

As someone who have not yet been married, I see this book as a great advice and guide. I never knew what a married life can be but I feel very secured if something like this happens to me in the future because of this book. It gives out the best advises that you can ever have. Very informative

and well written. For sure, this will be a great help!
