Occasionally there is a good bit of information. Unfortunately it is imbedded in questionable information that seems to be chosen to substantiate his conclusions. If you are trying to learn it may be hard to tell the difference between useful information and bunk. Lack of a perspective on the whole human system, just bits and pieces. He does not break out of this perspective. Uses correlations to prove constitute cause and effect. That just does not work. Some conclusions are a stretch from his assumptions. Lacks detailed data and in depth analysis. I have read several books on this subject. This is the most worthless. I did not find the comprehensive "How to Fight" solution I expected, just some bits and pieces.
