Customer Reviews

I have completed in, plus run a number of contests and this book tells players how to compete in Major Handicapping contests with comments and insights from previous winners. Noel Michaels has done an excellent job putting the information together in this book. I highly recommend it for anyone playing in contests, if they want the formula to give them a chance to win. I have provided this book for winners of small contests that I run and they have gone on to cash in the big contests after reading this book. This is a must read if you play contests whether you are new to them or just need a reminder on how to play competitive and win.

This is a reference book for contests. I wish I had purchased it earlier and used the information to enter DRF/NTRA contests. If you are interested in participating in contests this is a must. Mr. Michaels should have an inexpensive way (web site?) of updating his readers annually or as needed regarding contests. I don't see any reason future contest "books" need to be priced over \$10.

Helpful info and tips, especially for the first timer on the contest circuit. Some of the contest info is dated however and things change too often as far as venues, dates, and formats are concerned. That part of the book has limited usefulness.

terrific entry into these tournaments. also very entertaining.

Good book. Outdated info
