Synopsis

Many people are searching for legal information on the Internet.. Traditionally, it took a lot of time to obtain particular information from the court. Now, if you are a Pro Se researcher, obtaining such information is easier thanks to the PACER system. The PACER system has already existed two decades but it was only a few years ago that it has been implemented and made available to the general public through the World Wide Web. Using the PACER system in retrieving federal court information is easy but there are still many people who find it difficult to understand how the system works. Thus, this ebook will tell you everything that you need to know about the PACER system from how to register an account to how you are billed for the legal information that you get from the system. This book will show you how to save money on your PACER system bill. To date, this is the only book that gives detailed information that you need to know about the PACER system. If you need federal court information, then this ebook is definitely for you.

Just what I needed, a clear and concise guide to using PACER. When you've moved beyond public

records requests and need information from the court system, you need a facility with PACER. This guide takes you through the opportunities in the database step by step, in a easy to understand question-and-answer format. It demystifies the payment system and how to use it for free, which is incredibly useful information. Mastering this puts the power of information in your hands. This is an incredibly empowering guide, thank you!
